Junior Backend Developer

Motivated Junior Backend Developer with hands-on experience in building backend applications, RESTful APIs, and automation scripts. Proficient in Python, Django, PostgreSQL, and MongoDB, with additional skills in Linux administration and bot development. Passionate about clean architecture, database optimization, and continuous learning. Currently finishing high school at Odessa Lyceum №4 and actively preparing for a career in backend development. Completed Python programming courses at Odessa Polytechnic University.

WORK EXPERIENCE

Freelance Projects

2023 – Present

- Developed Telegram and Discord bots using Python, implementing features such as data storage, API integration, and automated workflows.
- Created small backend applications with Django and FastAPI, including PostgreSQL and MongoDB database integration.
- Built APIs for personal projects with authentication, CRUD operations, and user management.
- Configured Linux servers for deployment, automated environment setup with Docker.

EDUCATION

Odessa Lyceum №4

11th Grade Student (expected graduation: 2026)

Courses

Python Programming Course

Odessa Polytechnic University, 2023

SKILLS & COMPETENCIES

- Python (Django, FastAPI)
- PostgreSQL, MongoDB
- REST API Development
- Bot Development (Discord, Telegram)
- Linux (Ubuntu server administration)

- Git, GitHub
- Docker (basic)

PROJECTS

- Discord Music Bot – Developed with Python, yt-dlp, and discord.py, supporting queues, playback control, and YouTube integration.
- Trade Bot for GPO Game – Implemented autocomplete system, dynamic UI, and database storage of trades.
